

PT Pallet truck

Product information

The REMA PT pallet trucks fitted with pump (model 25) are very manoeuvrable and user-friendly. The tandem fork rollers are advantageous when using these pallet truck on a less smooth floor. Single truck roller designs are frequently used in the transport sector (rubber steer wheels and polyurethane rollers).

Properties

- Quick-Lift pump (model 25) for a quick lifting of pallets.
- The pump unit has an overload protection function.
- A chromate-coated and polished piston rod provides a long life for the hydraulic cylinder.

Operation:

- All pump functions can be operated precisely by means of the three-position control lever.
- Variable lowering speed even under load.
- The tow bar will automatically return to vertical position.

Fork:

• The robust plate steel fork profiles have flattened ends and they are fitted with in- and outrunning rollers to move pallets easier.

Optional footbrake:

- Optional only for the polyurethane and rubber steering wheels.
- The brake can be operated with a simple foot movement, for both locking and unlocking the brake.
- An advantage is that the pallet truck can remain in the highest position, e.g. on a tailgate (inclined angle), since the steering wheels
 are blocked.
- This prevents unnecessary lifting / pumping of a pallet.
- If you already own a Rema PT pallet truck, it is possible to provide the pallet truck with the foot brake, it can be retrofitted and ordered separately.

Technical specifications:

Highest fork position: 200 mm.

Steering wheel: 200 mm.

• Fork rolls: 82 mm.

Marking: According to standard, CE-marked Standard: EN 12100, EN 3691-5, EN 1757-2
