

DWM 380 - Material lifter

Product information

NEW

The Rema® DWM 380 Panel Lift is a versatile solution for the precise positioning of drywall, panels, insulation sheets, and similar materials. With a load capacity of 70 kg and compact dimensions of 950 x 1000 mm on the ground, this manual panel lift is designed to work efficiently in various applications. Whether you're dealing with construction materials or insulation, the DWM 380 Panel Lift is a reliable choice for your lifting and hoisting needs.

Features

- Double safety system due to the automatic load pressure brake and mast locking.
- Telescopic Mast movement for precise positioning.
- Rotatable and Tilttable Lifting Platform.
