

Aluminium Twistlock Karabiner RGK4

Product information

The 22mm aluminium twistlock karabiner is a lightweight double-action connector designed for use with belay devices and pulleys. Its automatic twistlock closure supports secure connection in professional rope access and rescue applications.

Best used for:

- Rope access systems using belay devices or pulleys
- Professional rescue applications requiring a lightweight connector

Product benefits:

- 22mm gate opening supports connection with compatible equipment
- Automatic twistlock closure provides secure double-action operation
- 83g aluminium construction reduces carried equipment weight
- Anodised aluminium construction provides a protective surface finish
