

RGK1 Steel Screwgate Karabiner

Product information

The 17mm steel screwgate karabiner is a manually locking connector for rope access, fall arrest and rescue applications. It's robust steel construction and screwgate closure make it suitable for professional work at height where a manually secured connection is required.

Best used for:

- Rope access, fall arrest and rescue systems
- Offshore and construction environments

Product benefits:

- Steel construction provides a robust connection for industrial applications
- Screwgate closure allows deliberate manual locking after connection
- 17mm gate opening accommodates compatible connection points
- Zinc plating provides a protective finish to the steel
