

NEW: Rema® Re-Line Harness

The Rema® Re-Line is a premium harness. Sturdy, comfortable and light, the Re-Line harness has it all. Moreover, the Re-Line harness is equipped with high quality click buckles to ensure a long durability.

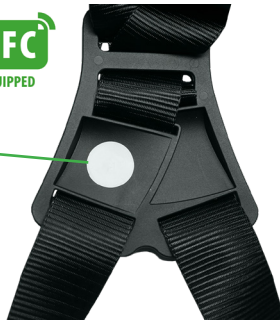

The Re-Line harness has two attachment points, one on the chest and one on the back. Both attachment points are made of steel for anchoring.

The recycled harness is made of OEKO-Tex approved eco-fiber. This means that the harness is free from harmful chemicals. The Re-Line harness is also PFC-free, meaning that there are no dangerous fluorinated compounds that are bioaccumulative.

Lastly recycled PET bottles were used during the production process.
